

Entry & Patio Door Systems
Impact-Rated Entry Door Systems

Why Parksite?

- Quick turnaround times on assembled and pre-finished doors from our state-of-the-art onsite production facility.
- Highly knowledgeable customer service and sales associates dedicated to help you with order, product, technical, and training support.
- Best in class operations and logistics team that utilizes voice technology picking for order accuracy.
- A fleet of dedicated Parksite trucks to deliver material to you when you need it.

Why Therma-Tru® Doors

Uncompromising quality, inside and out.

#1 Among Building Pros

It's a brand you can trust. Why? Because year after year, building professionals rank Therma-Tru #1 – as the brand they prefer most – in entry doors.*

Experience & Know-How

Behind every Therma-Tru door stands decades of experience and technical know-how. Therma-Tru makes or recommends every aspect – from the glass to the hinges – to bring your home durability and reliability through the years.

Lifetime Limited Warranty

When you pay close attention to every detail that goes into a door, you can stand behind its parts longer than the rest. That's why your Therma-Tru fiberglass door system is backed with a lifetime limited warranty – the industry's most comprehensive warranty of its kind.

Energy Efficiency

More than 80% of Therma-Tru door and glass options are ENERGY STAR® qualified and National Fenestration Rating Council (NFRC) certified, helping save money on energy costs.

*Brand Use Study, 2019 *Builder* magazine.

Note: See your Therma-Tru seller or visit www.thermatru.com for details on limited warranties and exclusions, and ENERGY STAR qualified products.

What a DIFFERENCE a DOOR Makes

Are You Remodeling?

There are so many ways to renovate a home. But adding a stunning new Therma-Tru entry door is one sure way to help homeowners add curb appeal.

Curb Appeal

Before

After

Now that's a smart investment.

\$18,750

A smart investment, a new Therma-Tru entry door can **increase** your home's perceived **value** by **4.2% or \$18,750 on average.**^{*1}

Homeowners who choose a stylish new Therma-Tru entry door can see **more than 2 times** the return on their investment.*

10 SEC.

Potential homebuyers will form an opinion about your home's value within **10 seconds of seeing it in person.**²

¹www.thermatru.com ²www.about.com

^{*}Not based on actual home sales. Not a guarantee of investment returns, increase in value or selling price. Based on a nationwide survey of consumers' estimates of perceived home value based on exterior appearance. Results may vary based on region and home style. Therma-Tru's "National Home Valuation Study" was commissioned by Therma-Tru in 2015 and conducted by TNS, an independent provider of Internet-based research.

FIND YOUR Home's Perfect MATCH

Get inspired to choose entry doors by design with our Architectural Home Styles Guide to popular home styles. Choose a door that brings out the best of your home's style. Let us help you find your match.

Turn Your Vision into Reality

Choose a door that brings out the best of your home's style. Then picture it on your home with the DoorWaysSM App.

1. Create and experiment with multiple door and glass combinations in the gallery.
2. Take a picture of your home and pop in the doors you designed.
3. Once you find your perfect new entry, locate your dealer to help you buy it.

for Fiber-Classic®, Smooth-Star® & Pulse® Fiberglass Doors

Tru-Guard™

The quality you expect from a Therma-Tru® door, with a completely composite exterior.

- Tru-Guard™ composite edges are engineered to work together with composite top and bottom rails and durable fiberglass door skins to help protect from water absorption and rot on all six sides.
- Matches wood-grained and smooth door skins, delivering an improved aesthetic with a uniform look around the edges of the door.

Buff Grained

White Smooth

Composite Edge Stile & Rail Rider for Enhanced Warranty Protection – Therma-Tru® doors with composite edge stiles and rails featuring Tru-Guard™ composite technology are backed by a lifetime limited warranty for peace of mind. In addition, these door slabs have enhanced warranty protection in the event of rotting and / or delamination and provides up to a \$300 labor allowance for residential, commercial and multi-family installations.

Tough When You Need It. Beautiful Always.

Impact Doors

Feature a built-in 24-gauge steel plate lining.

Impact Lip-Lite Frame

Features durable, paintable aluminum construction. An attractive scrolled profile gives a thin, sleek appearance and a screw channel cover helps hide unsightly screws.

Impact Glass

Features special laminated glass construction.

High-Power Testing

Our Impact-rated doors pass a large missile impact test. We blast a 9 lb. 2" x 4" stud into the doors at 34 mph to prove they're the better choice for strength and stability.

Tough When You Need It. Beautiful Always.

High-Power Testing

Our Impact-rated doors pass a large missile impact test. We blast a 9 lb. 2" x 4" stud into the doors at 34 mph to prove they're the better choice for strength and stability.

- Wind-Borne Debris Region (WBDR)
- High Velocity Hurricane Zone (HVHZ)

Impact-Rated Products

Therma-Tru offers Impact-rated doors and glass that can be used to meet high-wind and coastal region codes and regulations, offering excellent performance in extreme weather conditions while providing added protection.

1 Use the map as a guide to find out if you need product for WBDR or HVHZ.

Always confirm building code requirements in your area before buying.**

2 Use the icons to find available Therma-Tru® product options in this catalog.

WBDR / HVHZ Options: Look for this icon to find door and sidelite styles that can be configured for WBDR or HVHZ.

3 Verify that there is a Therma-Tru product approval specific to your area for the door system configuration before buying.**

4 Make sure the product is installed in compliance with the product approval to meet building codes.

The performance of the door system depends on how it is installed. Proper installation is required to comply with building codes.

*Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru Impact-rated product approval. Not impact tested for use in multi-lite door style configurations.

**Product approvals show that the door system meets applicable codes when selected, assembled and installed as instructed.

Note: See your Therma-Tru seller for details on available product sizes and options, limited warranties and exclusions, and the Florida Warranty Rider. Visit www.thermatru.com for product approvals and installation instructions. Always confirm building code requirements in your area before buying. Follow weather and news reports to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

Door Options

Choose from our many fiberglass doors to create an entry that complements the architectural style of your home. Options include wood-grained, stained or smooth, painted surfaces.

Classic-Craft. Premium Entryways

These premium fiberglass entryways come in four wood grains or a smooth surface that all rival the look of custom wood. Classic-Craft entry doors are rated a *Consumers Digest* Best Buy.

Architecturally correct for true classic beauty.

Doors designed to be architecturally correct, with proportions modeled after classic architectural principles, to create a more premium entryway.

Up to
25% wider
panels*

**Classic-Craft
Premium Door**

**Standard
Fiberglass Door**

Premium – right down to the edge.

A solid hardwood square edge delivers a genuine wood appearance.

Standard fiberglass bullnose edge.

The bullnose profile, typical of other fiberglass doors, detracts from the authentic wood look.

Smooth-Star®

Door Construction

Classic-Craft® Premium Entryways

1 Enhanced Weather Resistance

No more worries about rotting, warping or twisting. Classic-Craft premium entryways are tested and designed to resist extreme weather conditions and the damaging effects of moisture. Both the top and bottom of the door are protected by composite rails for a longer-lasting entryway.

2 Solid Security

Classic-Craft premium entryways feel solid and close with authority. A 4" wide beam of engineered lumber runs from the top to the bottom of the locking side of the door to add mass and rigidity, giving the door weight and a natural wood feel.

3 Excellent Durability

Built to stand up to the elements and years of wear, Classic-Craft's fiberglass skins are thicker than other standard fiberglass doors to provide added durability and better long-term performance.

4 Higher R-Values

Classic-Craft premium entryways contribute to an energy-efficient home. A polyurethane foam core provides up to four times the insulating R-Value of wood.*

5 Edge-to-Edge Moisture Protection

Resist moisture at every turn – and along every edge. Classic-Craft premium entryways have hardwood and composite edges that help prevent moisture penetration.

Fiber-Classic® & Smooth-Star® Doors

1 Weather Resistance

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

2 Security

An enhanced lock block combined with a 1-1/4" engineered lumber lock stile increases rigidity and stability.

3 Durability

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

4 R-Values

Built with a polyurethane foam core, Thermo-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency, offering up to four times the insulating R-Value of wood.*

5 Tru-Guard™ Composite Edge

Tru-Guard™ composite edges are engineered to work together with composite top and bottom rails and durable fiberglass skins to help protect from water absorption and rot on all six sides.

A Complete Door System

A Therma-Tru® door with genuine Therma-Tru parts is more than just a beautiful door. It's a complete door system – from the glass to the hinges – made to perform as good as it looks.

① Frame Options

We can help you choose the right frame for your door system.

② Removable Weatherstrip

Our resilient design compresses when closed and springs back when open. It's protected by a durable jacket for long-lasting sealing power.

③ Hardware

Choose from beautiful options that will complement the look of your home and help bring you security and peace of mind.

④ Ball-Bearing Hinges

Hinges with ball bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly.

⑤ Security Strike Plate

Hinges with ball bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly.

THESE TWO SILLS CAN BE USED IN THE HVHZ REGION.

⑥ Composite Outswing Sill

(See Product Approval Matrix for HVHZ Applications)
Thick wood-grained composite cap and nosing. Integrated weatherstrip.

⑦ Coastal Sill

(For Coastal Region)

All-aluminum construction resists corrosion, extra-high cap profile provides improved resistance to wind-driven moisture infiltration, and integrated weatherstrip helps form a tight seal under wind pressure. Helps meet code requirements in HVHZ coastal regions.

Multi-Point Locking Systems (MPLS)

Engages the door and frame at three critical points from top to bottom for enhanced stability compared to traditional deadbolt assemblies. Features premium stainless steel construction that resists corrosion.

Lever-Style MPLS

Lever-style handlesets bring form and function together with decorative styles. A convenient upward turn of the handle is required before all three points will engage. An integrated mishandling device helps protect the door and frame from accidental damage. Features deadbolt below the handleset.

(Highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors. Strike plate packages available to meet the installation needs of various MPLS applications.)

Tongue

Shootbolt

(For door systems with an astragal.)

Engages at three critical points.

Exterior view of door.

- ① Self-lubricating locks.
- ② 1" premium stainless steel deadbolt.
- ③ Integrated mishandling device.

WARRANTY

10-Year Warranty

Durable Topcoat

Professional Application

PrismaGuard® Stain

Brings the authentic look of wood to life with rich tones that add dimension to enhance wood grain doors.

- 1 It starts with the realistic wood grains and deep embossments of a Therma-Tru® door.
- 2 A base coat provides an even, consistent color across the surface of the door.
- 3 A wiping stain enhances the base coat to reflect the natural beauty of wood.
- 4 A durable topcoat enhances the color while protecting against scratches and color fading.
- 5 A second application of the topcoat provides added durability.

PrismaGuard® Paint

Delivers a pop of color, allowing you to tailor the look to make a beautiful lasting impression.

- 1 It starts with the realistic wood grains or premium smooth surface of a Therma-Tru® door.
- 2 A base coat provides an even, consistent color across the surface of the door.
- 3 A durable topcoat enhances the color while protecting against scratches and color fading.
- 4 A second application of the topcoat provides added durability.

Note: Finish colors may vary from an actual application due to fluctuations in finishing or printing. See your Therma-Tru seller for details on the PrismaGuard warranty and exclusions.

Composite Door Frame

featuring Tru Guard™ Composite Technology

Composite Door Frame

A rot-free solution engineered to work together with rot-resistant Therma-Tru® doors and components.

- Delivers extra protection from the damaging effects of moisture for peace of mind.
- Eliminates the risk of rot and wood-ingesting insects with a durable composite material that is virtually maintenance free.
- Rot-free door frame does not absorb moisture and resists mold, mildew and fungus.

Composite Door Frame Lifetime Limited Warranty

Jamb-only warranty option also available.

10-Year Transferable Full-System Rider

Full-System Therma-Tru Door systems

Available Textures

✓ Ready to finish.

Buff Grained

- Features a universal wood grain to complement a wide range of grain species.
- Stain or paint to complement the entry – no sanding or priming required.

✓ Ready to install.
Ready to finish.

White Smooth

- Features a matte finish similar to painted wood and includes a protective layer with UV inhibitors to help resist yellowing and fading.
- Ready to install as-is – no painting required. Or finish with stain or paint to complement the entry – no sanding or priming required.

Reinforced Mullions

Shown Top: LVL core shown on buff grained mullion. White smooth mullion also features LVL core.

Shown Below: Composite cap on white smooth mullion. Buff grained mullion also features composite cap.

All mullions are reinforced with an ① LVL core to provide additional structural support and stability and feature a ② composite capped bottom to eliminate the risk of water absorption.

Hinged Patio Door Systems

A Therma-Tru® patio door with genuine Therma-Tru parts is a complete door system with doors, glass and parts engineered to work together for durability and reliability through the years.

- 1 Multi-Point Locking System (Recommended)
- 2 Bottom Sweep
- 3 Sill
- 4 Hinges
- 5 Corner Seal Pads (Inswing Only)
- 6 Rain Deflector (Inswing Only)
- 7 Sill Pan (Recommended)
- 8 Astragal
- 9 Frame Components

Vented Sidelites*

Enjoy the view – and a fresh breeze, too.

- Sturdy stiles and hinges make the unit work as a small swinging door.
- Wide patio mullions provide dependable operation.
- Multi-point lock and continuous system help provide security and stability.
- Convenient removable screens – available in bronze and white – are designed for worry-free use.

*For inswing use only.

All construction is Book Size, boxed, inswing and outswing, and all doors and sidelites are 3/0 max width, unless otherwise noted

All doorlite glazing are lip lites unless otherwise noted

All astragals are Coastal Astragals unless otherwise noted

Construction

36 = 3/6 Max Door Width

14 = 14" Max Sidelite Width

c = Lip Lite

f = Flush Glazed

m = Molded Open

Construction

MPL = Multipoint Lock

NS = Non Impact Sidelites

H = Hybrid and U-1 also approved

Configuration

X = Active Door

O = Fixed Door or Sidelite

Design Pressure

I = Inswing

O = Outswing

Therma-Tru® Door Systems

Independent Laboratory Performance Testing

At the time of manufacture, Therma-Tru exterior door systems (properly assembled with all genuine Therma-Tru components) have been tested under one or more of the following performance specifications: structural load, uniform load deflection, vertical load resistance, air infiltration, water penetration resistance, forced entry resistance, operating forces, force to latch, deglazing resistance, operating cycle performance, impact resistance, sound transmission, thermal performance and solar heat gain performance. Therma-Tru exterior door systems conform to the applicable Performance Standards / Test Methods that may include ANSI/AAMA/NWDA 101/I.S.2, AAMA/WDMA 101/I.S.2/NAFS, AAMA/WDMA/CSA 101/I.S.2-A440, ASTM E330, ASTM E547, ASTM E283, ASTM E 331, ANSI/BHMA A156.2, AAMA 1304, AAMA 920, AAMA 925, ASTM E2068, ASTM F842, ASTM E987, ASTM E1300, ASTM E90, ASTM E413, ASTM E1332, ASTM E1886, ASTM E1996, PA/TAS 201, PA/TAS 202, PA/TAS 203, HUD UM89, AAMA 1702.2, 24 CFR 3280, 24 CFR 3282, NFRC 100 and NFRC 200. Refer to www.thermatru.com for design pressure and other performance ratings.

Doors

Recommended Door Overhang – For best performance, all doors should be protected by an overhang. The recommended size is half the distance from the base of the door to the bottom of the overhang. So, as an example, a distance of 10' for this dimension would require an overhang of 5' minimum. For wetter climates, southern or western exposures, and for double doors, the overhang should be the same as the distance from the base of the door to the bottom of the overhang. In this same example, the dimension is 10' so the overhang should be 10'.

For best performance, double doors to be used in areas with severe weather exposure must be installed using entry alcoves or large soffit overhangs to protect entry unit from exposure. Multi-point locking systems are highly recommended for 8'0" and double door applications.

Doorlites

Doorlites are insulated, and exposed panes are tempered. Optional wood grilles available for clear doorlites and transoms.

Inserts – All glass (except flush-glazed styles) shall be bedded with glazing mastic and secured in doors with screws. Therma-Tru's SMC and BTS doorlite frames are available for most styles except where noted. SMC and BTS frames shall resist significant deformation by heat up to 200 degrees Fahrenheit, regardless of paint or stain color or placement behind a storm door.

PVC doorlite frames and dividers must be finished within 30 days of installation. Failure to do so will increase the chance for product damage of the type that is not covered by the warranty. PVC doorlite frames and dividers are not recommended for use behind storm doors or to be painted dark colors, if exposed to direct sunlight.

Decorative Glass & Wrought Iron – Each Therma-Tru decorative glass unit is handcrafted by skilled artisans replicating Old

World techniques. Each piece is a unique work of art and many things that would appear to be imperfections (small bubbles, lines and waves within the glass) are normal and are part of the Old World charm.

Condensation occurs naturally in the home, caused by excessive humidity in the air. Often this harmless water vapor can be seen collecting on glass surfaces, such as doorlites. Energy-efficient glass units in Therma-Tru door systems are constructed to keep the glass as warm as possible, reducing condensation build-up. However, there is no such thing as a condensation-free window or doorlite in high-humidity conditions.

NOTE: Glass privacy ratings are determined by the 1/2-lite glass size. As a result, the amount of privacy / glass transparency may be more or less than indicated by the privacy rating, based on the glass design and size of the glass that is inserted into the door, sidelite or transom.

Glass designs may differ from depiction due to the size and hand craftsmanship of glass. See your Therma-Tru seller or visit www.thermatru.com for more details.

Components

Adjustable Security Strike Plate – Proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16".

Hinges – Minimum hinge size 4" x 4" x .098".

Ball-bearing hinges are recommended for 8'0" doors, doors using heavy lites (e.g., wrought iron), all 20-Minute Fire-rated fiberglass doors, Impact-rated doors and glass, and all Classic-Craft doors.

Use of the multi-point locking system is highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.

Please be aware that single door units built with public access sills have little resistance to water penetration, and double doors built with these sills have a potential to leak if installed exposed to weather. We recommend that units be installed away from weather under large soffits or overhangs.

Use of a sill pan is recommended.

Fiber-Classic and Smooth-Star dentil shelves are not recommended for placement behind storm doors or to be painted dark colors, if exposed to direct sunlight.

Impact-Rated Products

Impact-rated products must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru product approval. Visit www.thermatru.com for product approvals and full details on WBD- (Wind-Borne Debris Region) / HVHZ- (High Velocity Hurricane Zone) compliant products. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

Fire-Rating Performance Standards

Fire and building codes vary throughout the country and acceptance of products and labels is left to the discretion of the local authorities.

MODIFICATION OF PRODUCTS DESCRIBED IN THIS BROCHURE WHICH CARRY FIRE

RATINGS (DOORS AND FRAMES) MAY VOID THE FIRE RATINGS.

Test conducted by Intertek, Warnock-Hersey.

Limited Warranties

Please be aware of the applicable Therma-Tru Limited Warranty which contains important restrictions, disclaimers, exclusions and conditions, as well as the below listed Installation, Finishing & Maintenance documents, related to the Therma-Tru product purchased (e.g., Fiberglass, Steel, Patio Door Systems), all of which can be obtained from your Therma-Tru seller or found in their entirety at www.thermatru.com:

- Therma-Tru Fiberglass and Steel Door Systems Residential Limited Warranty: Fiberglass – Classic-Craft, Fiber-Classic, Smooth-Star, and Pulse. Door Systems; Steel – Pulse, Profiles, Traditions and Therma-Tru Fire Door (TR 12-24) Steel Edge Door Systems.
- Therma-Tru Tru-Defense Door System Rider to Fiberglass Door Systems Limited Warranty: Classic-Craft, Fiber-Classic, Smooth-Star, and Pulse. Fiberglass Door Systems.
- EnLiten, Flush-Glazed Construction & Installation Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft, Fiber-Classic, and Smooth-Star. Flush-Glazed Fiberglass Door Systems.
- EnLiten, Flush-Glazed Homeowner Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft, Fiber-Classic, and Smooth-Star. Flush-Glazed Fiberglass Door Systems.
- PrismaGuard Limited Warranty Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft, and Fiber-Classic. Door Systems.
- Same-Day, Stain 5-Year Limited Warranty: Same-Day, Stain and Topcoat for Use on Therma-Tru Fiberglass Door Systems and Fypon, Stainable Polyurethane Products.

Installation, Finishing & Maintenance

Installation, finishing and maintenance must be performed according to Therma-Tru's recommendations to comply with warranty requirements. Obtain a copy of the following documents outlining recommendations from your Therma-Tru seller or find them in their entirety at www.thermatru.com:

- Installation Instructions
- Therma-Tru Fiberglass and Steel Door Systems Recommendations for Proper Finishing and Painting or Staining

NOTE: Finish colors may vary from an actual application due to fluctuations in finishing or the printing of this catalog. See your Therma-Tru seller or visit www.thermatru.com for more details.
